

for immediate release**Pickering Site of Wardrop's Newest Office****...now serving the Durham Region**

PICKERING, ON, June 21, 2007...Wardrop Engineering Inc. selected Pickering, Ontario as the site of its newest office. The move consolidates the company's nuclear operations and brings more than 200 employees to the city to better serve its clients in Durham Region and beyond.

"The area has an abundance of professional and technical talent and Wardrop will continue to recruit locally to meet the growing business opportunities locally, nationally, and internationally," said Hany Michael, senior vice president of the company's Nuclear Division. Located at 1055 Squires Beach Road, the new office is in close proximity to one of Wardrop's key clients, Ontario Power Generation.

A Grand Opening and official ribbon-cutting ceremony were held on site, today, to officially launch Wardrop's services in the region. A number of government officials, business representatives, along with clients, staff, and the media, applauded the move and joined in the celebration.

Wardrop is an award-winning multi-disciplined engineering consulting firm providing innovative solutions. The company has a team of more than 1,000 technical and professional experts who work collaboratively through its North American and overseas operations. The company was recently named, for the sixth time, to the list of Canada's Top 100 Employers.

BACKGROUND

people, passion, performance...trusted globally

Founded in 1955 with a vision of expansion, diversification, technological leadership, and a commitment to providing quality service, that business model continues today. Fuelled by customers that recognize Wardrop as a valued player in their respective industries, the company has enjoyed tremendous growth both in terms of capability and geographic presence, particularly over the past decade. Wardrop has annual revenues of \$100M, 14 offices across North America, and over 1,000 employees that work collaboratively to execute projects on a global scale. To date, the company has successfully completed projects in over 50 countries.

Wardrop has helped to revolutionize commerce and industry through its involvement in some of the world's most significant endeavours – from the International Space Station and mapping of the human genome, to managing radioactive waste, safely, and developing landmark infrastructure projects. It has enjoyed tremendous growth on a global scale with expanded contributions to major mining, energy, and infrastructure developments, joint ventures, and collaborative R&D initiatives. Wardrop has had a long-term presence in Africa, which continues to evolve.

The company takes great pride in hiring the very best people and has distinguished its services through their passion and the mutually satisfying customer relationships that have been developed over many years. Wardrop has surmounted some of the most intense logistical challenges for its clients, through innovative solutions and excellence in program management. The company's success is based on exceeding expectations and satisfying customers.

Wardrop provides integrated services multi-disciplined engineering, environmental, and information systems to clients in three distinct markets - Energy, Infrastructure and Mining / Minerals - throughout the world. The company was recently named to the list of Canada's Top 100 Employers for the sixth time.
